PROFESSIONAL SUMMARY

Software Development and AI/ML enthusiast with hands-on experience building responsive web applications using React, Next.js, Tailwind CSS, and Firebase. Skilled in reusable components, dynamic routing, API integration, and data-driven UI rendering, with exposure to Python, SQL, semantic search, LangChain, RAG, embeddings, recommendation signals, and personalization workflows.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend / Data: Firebase, REST APIs, JSON, SQL, Python, Pandas, NumPy

AI / ML: LangChain, RAG, Semantic Search, Embeddings, FAISS, NLP, OpenCV

Tools: Git, GitHub, VS Code, Jupyter Notebook, Streamlit, Netlify

PROFESSIONAL EXPERIENCE

Frontend Developer Intern | Anslation | March 2026 - Present

- Built the complete Exclusive Deals page using Next.js, React, Tailwind CSS, Firebase, and dynamic routing.
- Developed responsive UI modules for deals, coupons, trending prices, top brands, stores, FAQ, feedback, smart deals, and blogs.
- Created reusable frontend components such as sliders, skeleton loaders, filters, modals, category views, and dynamic navigation.
- Integrated Firebase data into deal, coupon, brand, upcoming deal, and personalized content sections.
- Worked on Alftool microtools including dictionary, focus timer, gradient generator, and image-to-video UI interfaces.
- Supported ANSI personalization work involving user profiles, event data, recommendation signals, semantic search, embeddings, FAISS, and RAG concepts.

Frontend Developer Intern | Aargus Infotec | July 2025 - November 2025

- Developed responsive React.js interfaces for an AI-based invoice extraction system to display invoice number, date, vendor, amount, and extracted document fields.
- Integrated REST API and backend extraction outputs with frontend components to support review, validation, and correction of invoice data.
- Built reusable UI components for structured invoice tables, field-level review screens, status handling, and user-friendly data presentation.
- Worked with backend and data teams to test extraction results, debug UI issues, and improve the accuracy and usability of the review workflow.

Data Analyst Trainee | Anudip Foundation | July 2024 - September 2024

- Cleaned and analyzed datasets using SQL and Python.
- Built dashboards and reports to communicate trends and insights.

PROJECTS

AI Resume Analyzer

Tech Stack: React.js, Python, FastAPI, NLP, Generative AI

- Developed an AI-powered tool that compares resumes with job descriptions and generates ATS-style match scores. Built skill extraction, matched/missing keyword detection, improvement suggestions, and FastAPI backend APIs for real-time resume feedback.

Job Pipeline Tracker

Tech Stack: React.js, JavaScript, Tailwind CSS, Vite, localStorage

- Built a responsive job tracking dashboard to manage applications, statuses, priorities, follow-ups, notes, and sources. Implemented search, filtering, sorting, metrics cards, CSV/PDF export, and persistent browser storage.

LangChain Chatbot

Tech Stack: Python, LangChain, Streamlit, Gemini API

- Developed a conversational AI chatbot with memory handling using ConversationBufferMemory and ConversationChain architecture. Implemented prompt handling, contextual response generation, and real-time user interaction flow.

EDUCATION

B.Tech in Computer Science (Internet of Things), ABES Institute of Technology, AKTU | 2021 - 2025 | CGPA: 8.5/10

Senior Secondary (Class XII), RR Public School | 2021 | 87%

CERTIFICATIONS

- Accenture North America - Data Analytics & Visualization Job Simulation
- PwC Switzerland - Power BI Job Simulation
